15 March 2005

Our Army At War - Relevant and Ready!

21st Century Security Environment: An Era of Uncertainty and Unpredictability

— a blurring of familiar distinctions between war and peace.

“Fueled by an ideology that promotes intractable hatred, this war will endure in some form for the foreseeable future.....

.....must therefore be prepared to sustain operations during a period of persistent conflict

..... this is the most significant feature of the current and anticipated operating context.”

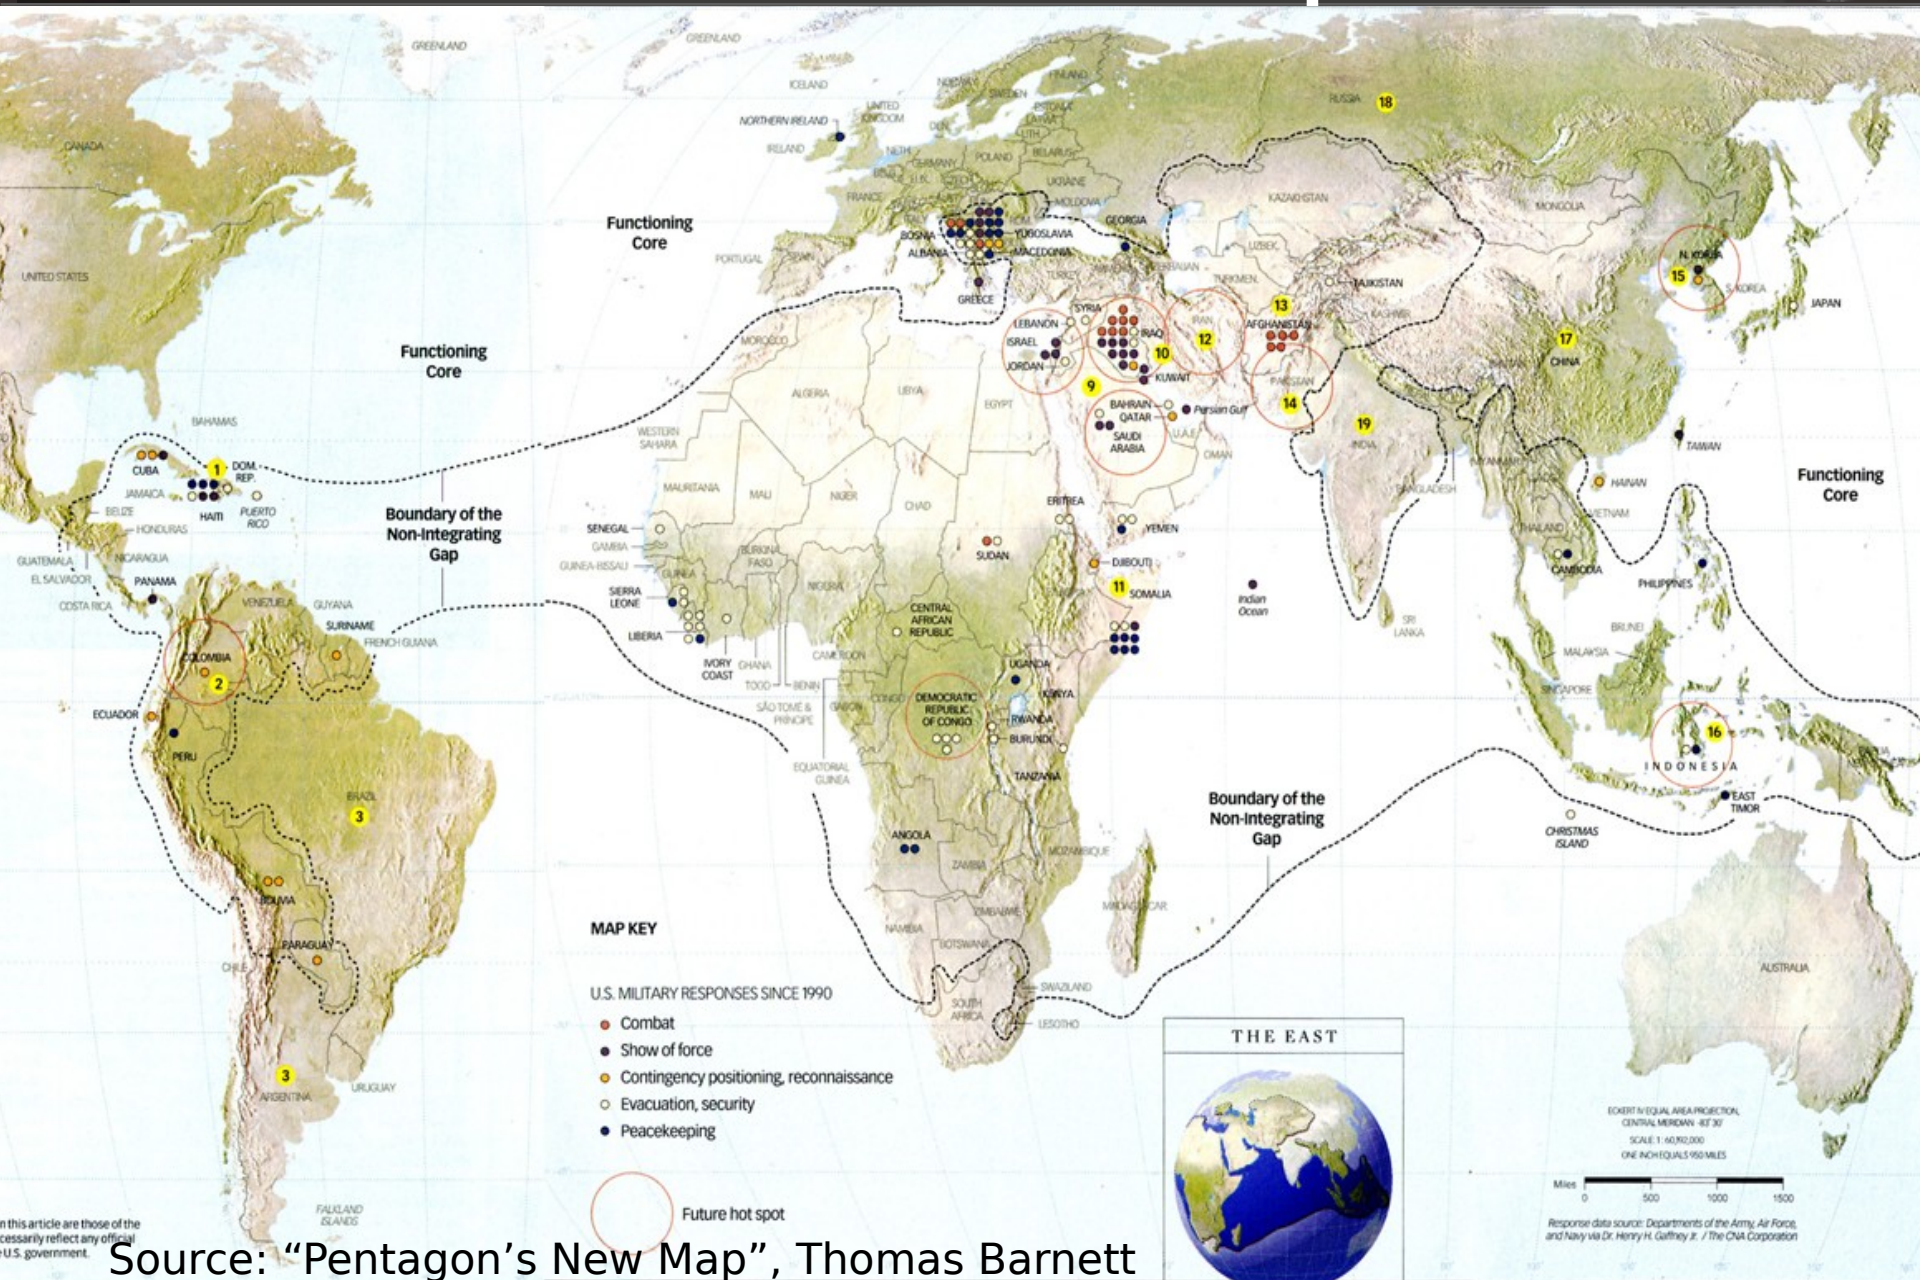

*Fiscal Year 2005 Army Game Plan
1 November 2004*

Current Orders

- Active (AC)	494,000	N/A
- Reserve (RC)		
USAR	200,000	48,000
ARNG	334,000	108,000
	1,028,000	

U.S. ARMY

Arrival Ceremony for the Secretary of the Army

6 December 2004

“.....The technology that is at the **center of Transformation is Information Technology.**

The **long term goal** Transformation..... **an organization that is capable of conducting Network Centric Operations,** in a totally joint fashion, to include our allies and partners.”

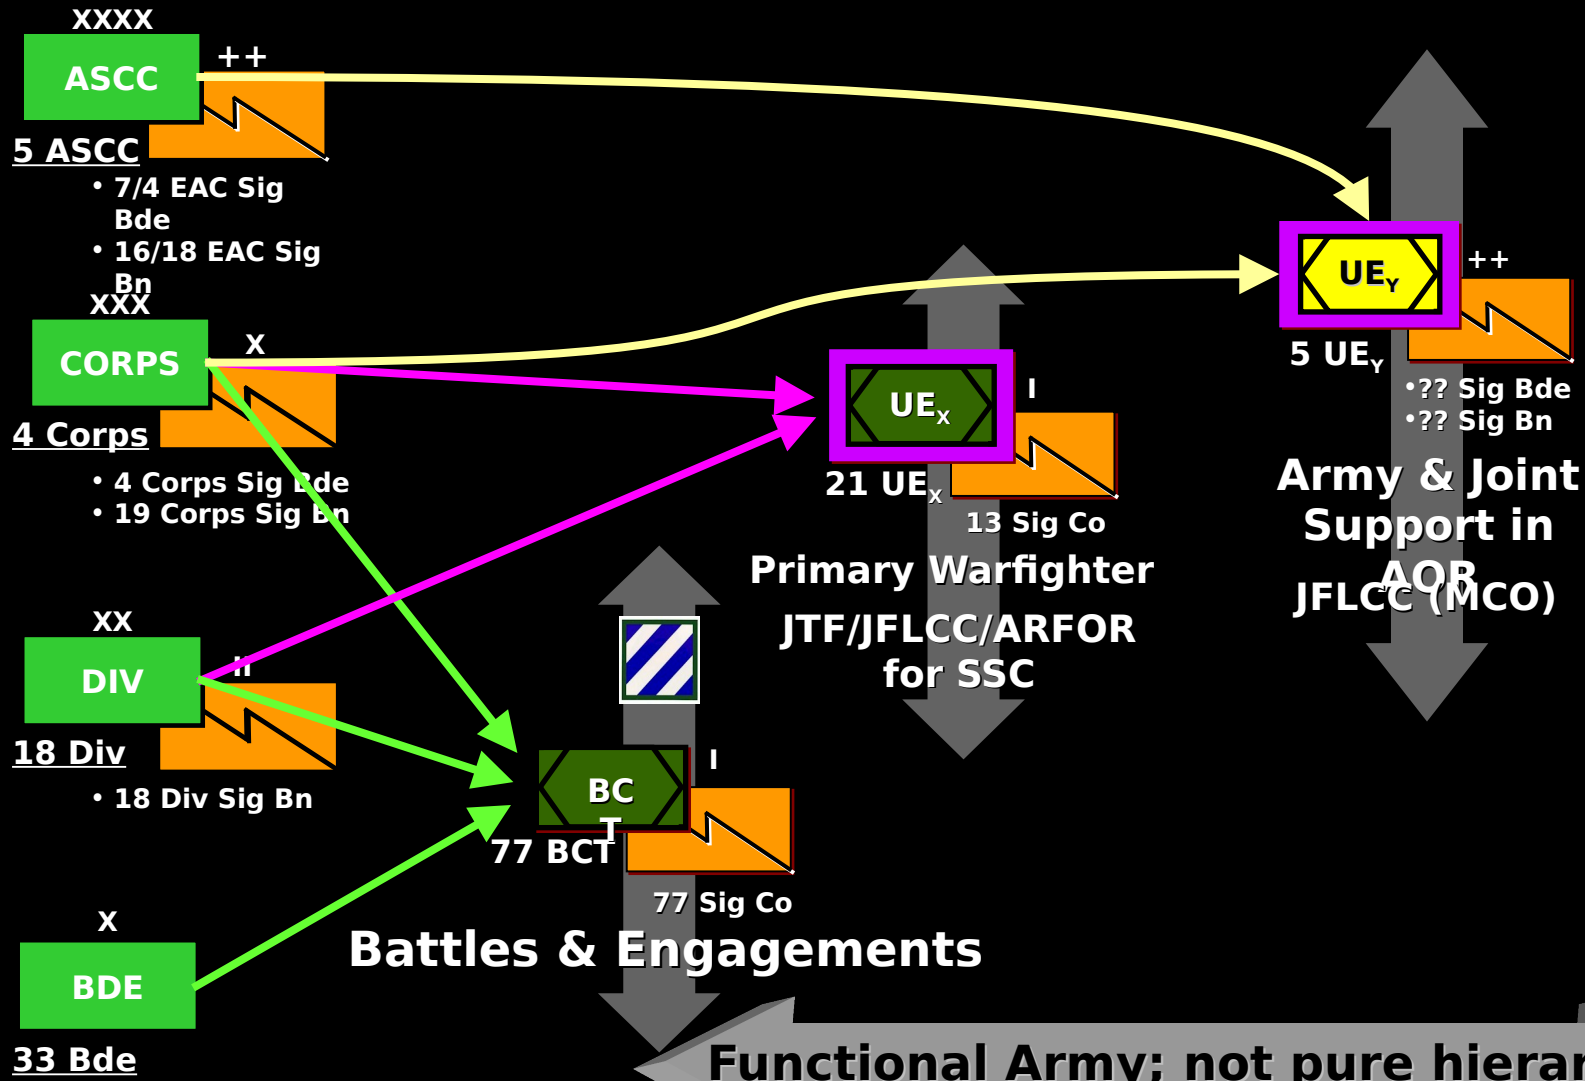

“..... a **network centric capable force is one that is robustly networked**, **fully interoperable** and **shares information** and collaborates **by means of a communications and information**

...Brigade centric, and more versatile and efficient

Current

Transformed

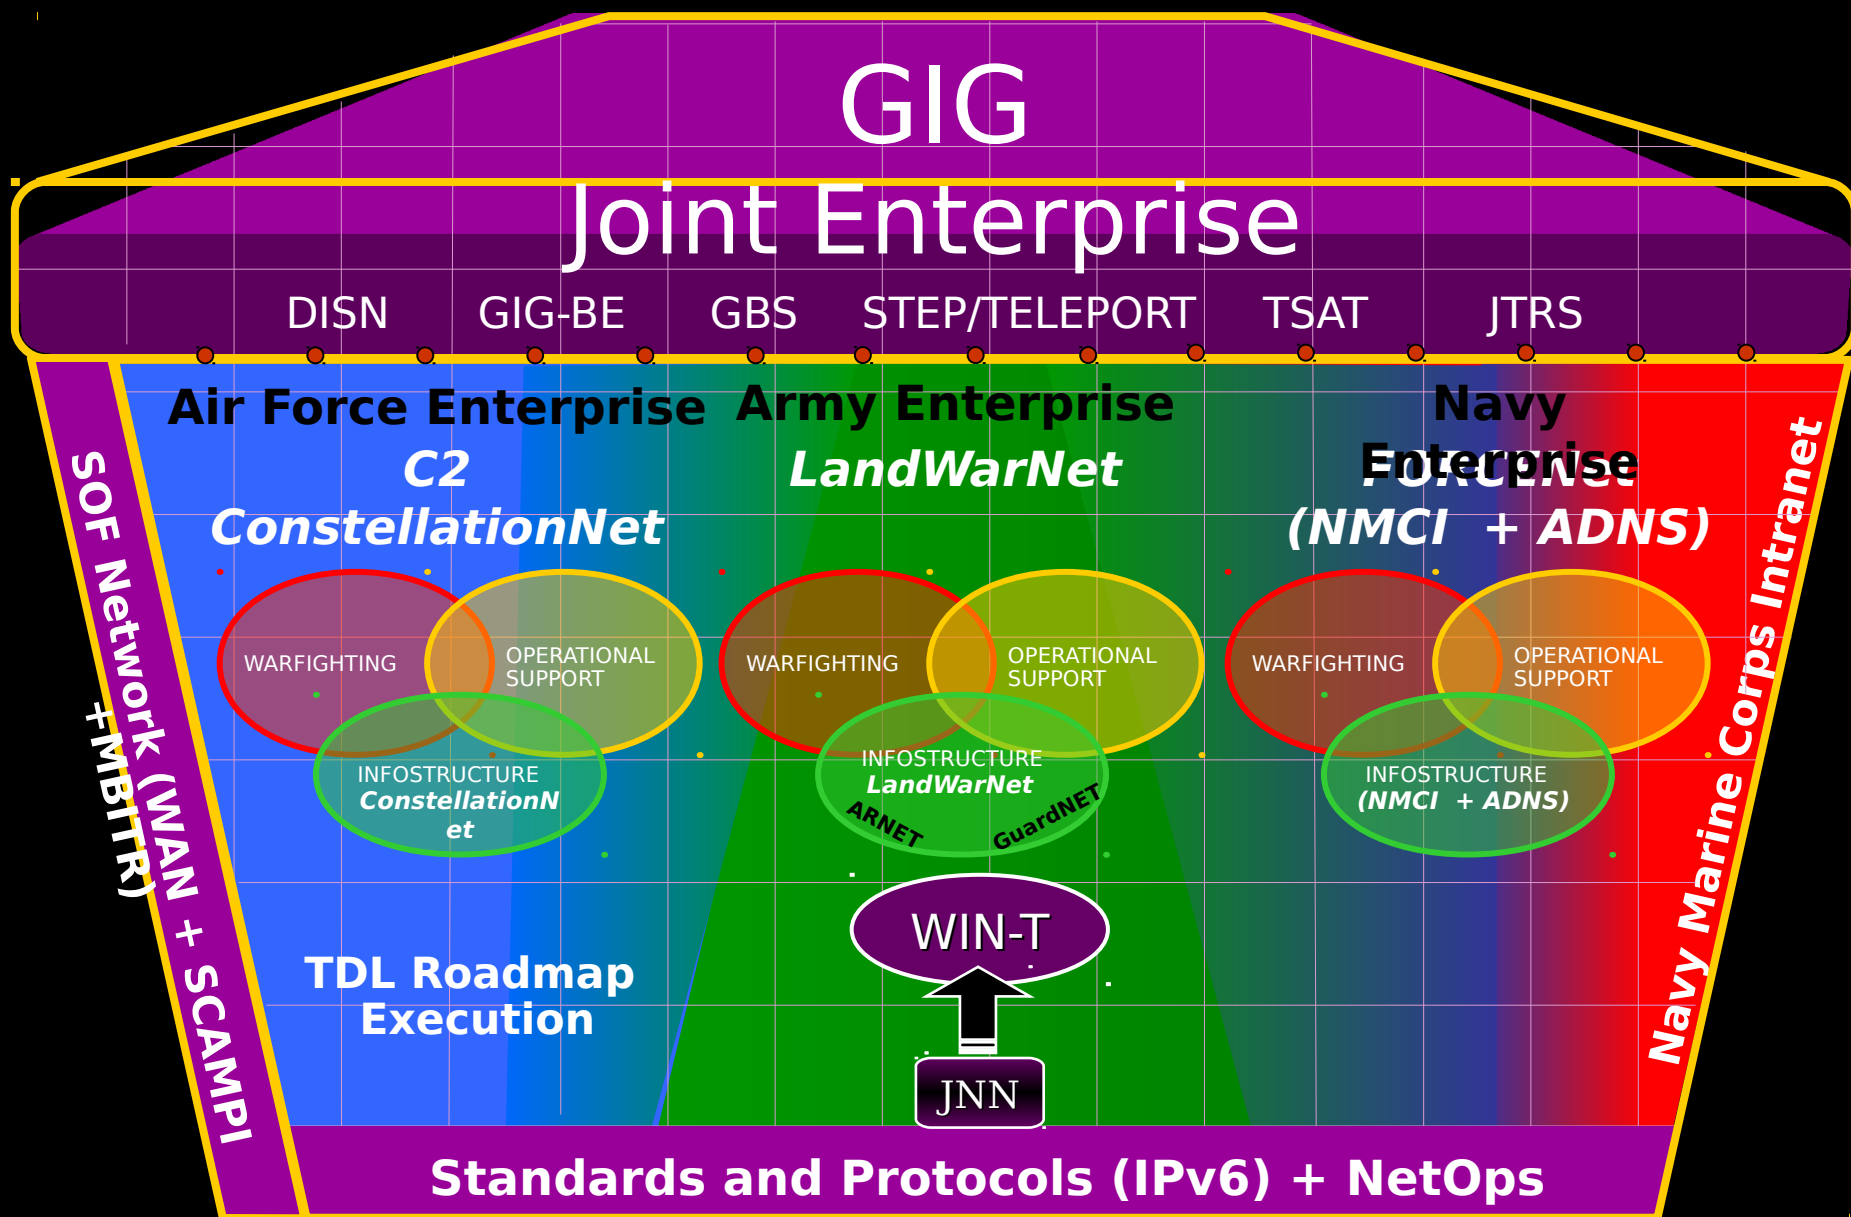

Functional Army; not pure hierarchy

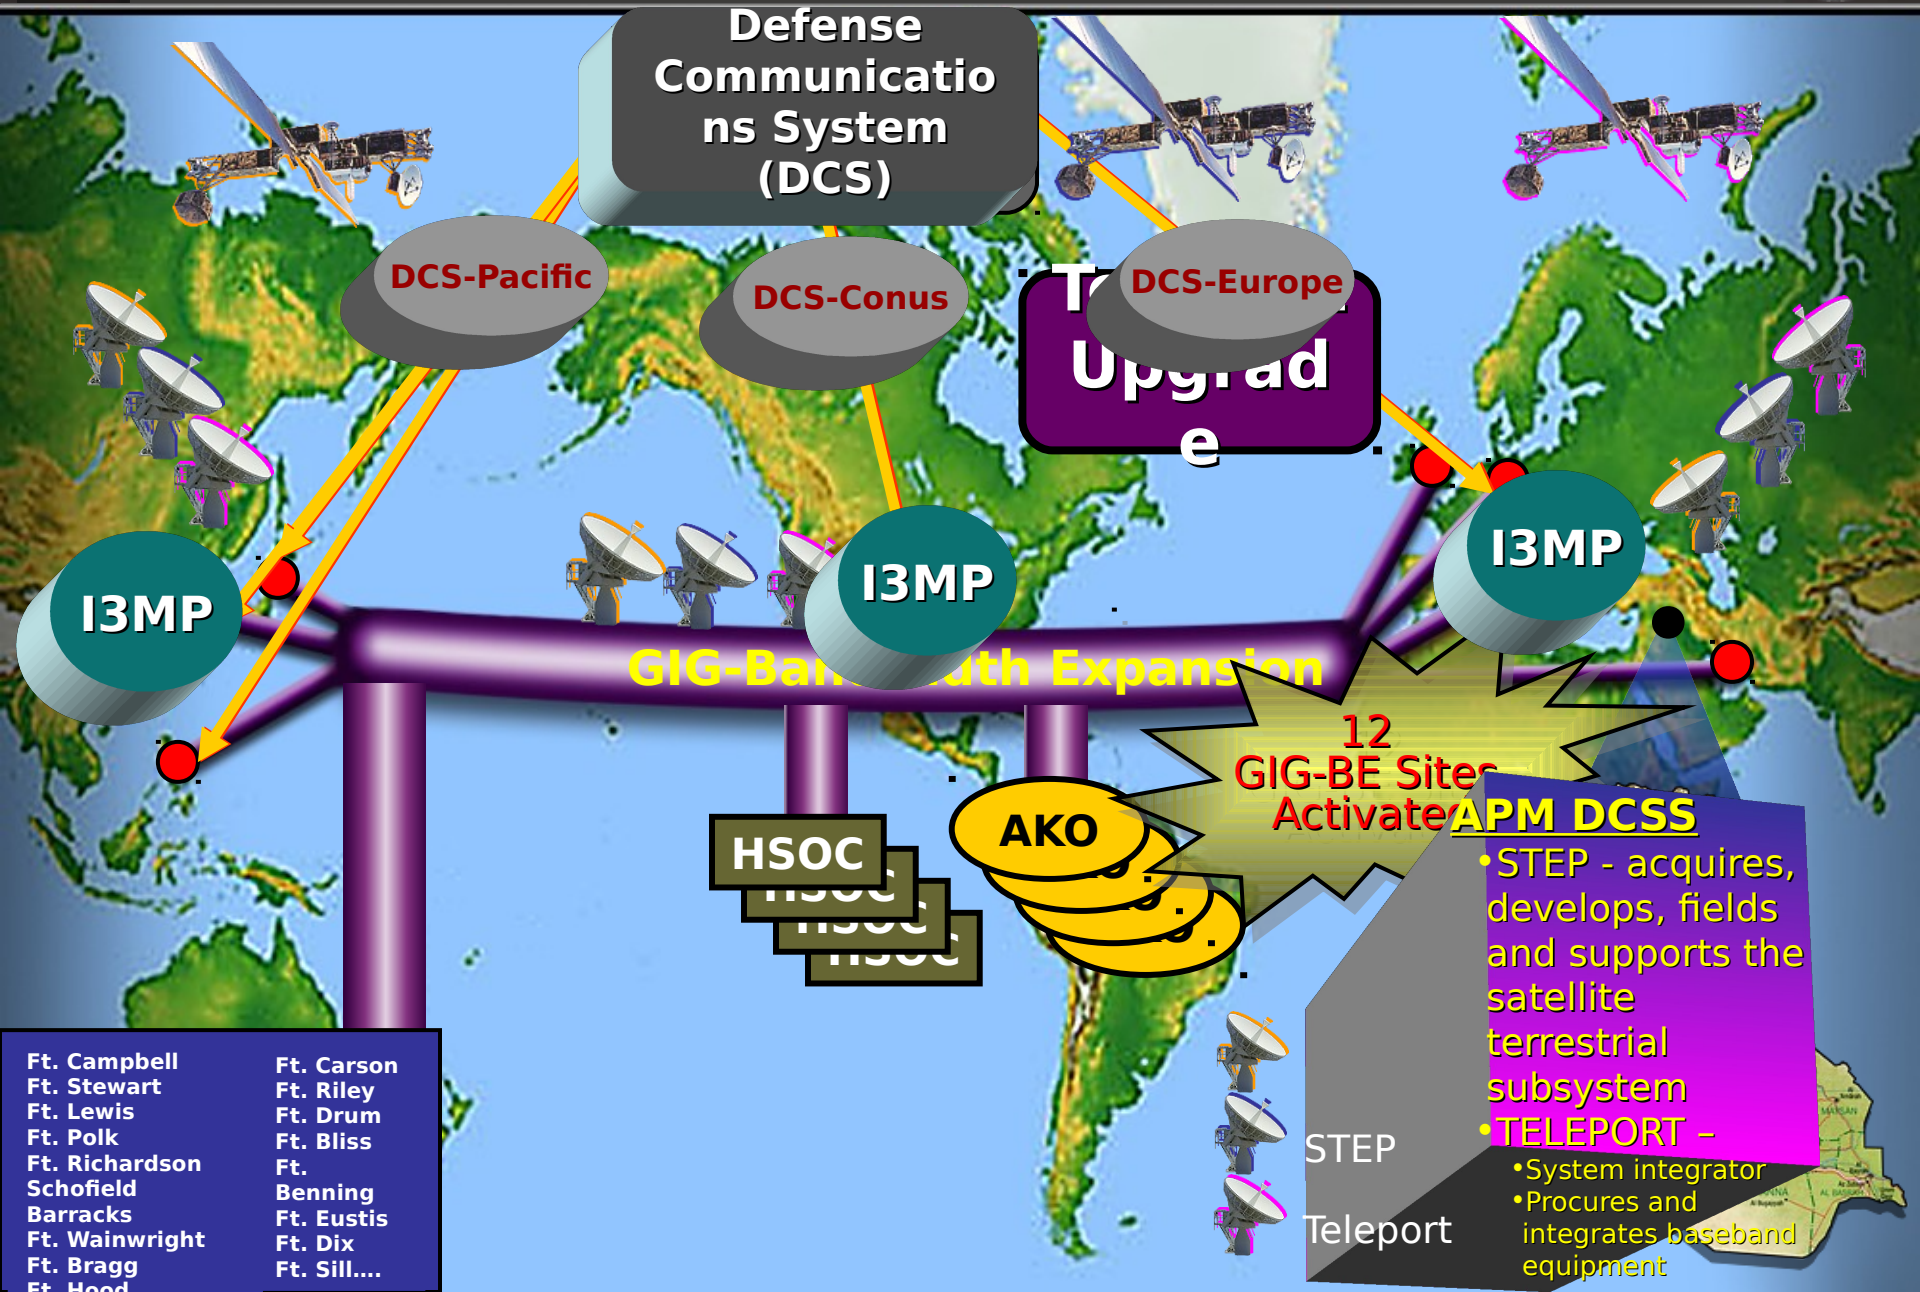

U.S. ARMY

Global Information Grid (GIG)

DISN (GIG-BE) 2004 - 2007

Installation Information Infrastructure Modernization Program (I3MP)

Upgrading and expanding Army Installation Networks worldwide

- **I3MP Extends GIG-BE onto Posts, Camps and Stations**
- **I3MP Components**
 - ✓ Secure and Non-Secure Voice: MACOM Telephone Modernization Program/Defense Information System Network - Europe/Extended Korean Improvement Program.
 - ✓ NIPR and SIPR Common User Installation Transport Network.
 - ✓ Connectivity to GIG and GIG Bandwidth Expansion: Army DISN Router Program.
 - ✓ Outside Cable Rehabilitation.
 - ✓ Installation Information Assurance Architecture.
 - ✓ E-mail and storage servers.

Starting in FY 2005

- FT Stewart & HAAF
- FT Benning & DTA
- FT Campbell
- FT Hood
- FT Drum
- FT Carson & PC
- FT Bragg
- Schofield Barracks & WAAF
- FT Lewis & YFC
- FT Polk
- FT Richardson/Wainwright
- FT Riley
- FT Bliss
- Yongsan Garrison
- Camp Ederle (Vicenza)
- Camp Humphreys
- Grafenwoehr East Camp
- Camp Zama
- Grafenwoehr Training Area
- Camp Walker
- Patch Barracks
- FT Irwin & NTC

Elements of Modularity

- ✓ Conversions to UA/BCT
- ✓ NIPR and SIPR to Battalion and Company
- ✓ Expanded digital training, i.e. multipurpose digital training ranges, etc.
- ✓ Motor Pools and Logistics Points
- ✓ New or additional UA/BCT
- ✓ Global  and re-stationing

Kuwait-Iraq C4 Commercialization

Build & Extend the GIG in the AOR

- Build - Camp infrastructure & connectivity
- Extend - CMN & transportable commercial systems

Reduce tactical signal unit support

Coalition Military Network Sites

**Completed CMN
in time to support
Coalition
operations to
clear insurgents
out of Fallujah and
other hotbeds**

- Fiber
- SATCOM
- Microwave
- Tech Control Facilities
- Cabling

Major Nodes (32 phones)
Minor Nodes (16 phones)

Communications Transition

Tactical to Commercial

**Priority
...build theater
infrastructure
backbone versus
replace specific
units**

**Capitalize
on
infrastructure
as it
matures**

**Provide
sufficient
assets to
support
sustainable
rotations**

**70% of
signal
assets
committed
to the first
fight**

**FY03-
Replaced
2.5
"Unique"
Battalion units**

- 86th Signal Battalion 
- 40th Signal Battalion 
- 269th Signal Company 
- 578th Signal Company 

**FY04 -
Replaced
• 2 EAC
Battalions
• 2 Troposphere**

- 72^d Signal Battalion 
- 67th Signal Battalion 
- 321st Signal Company (N) 
- 143rd Signal Company (N)

Identify Data Standards: Tactical

**Which is the
Authoritative Data
Source for
Target Location?**

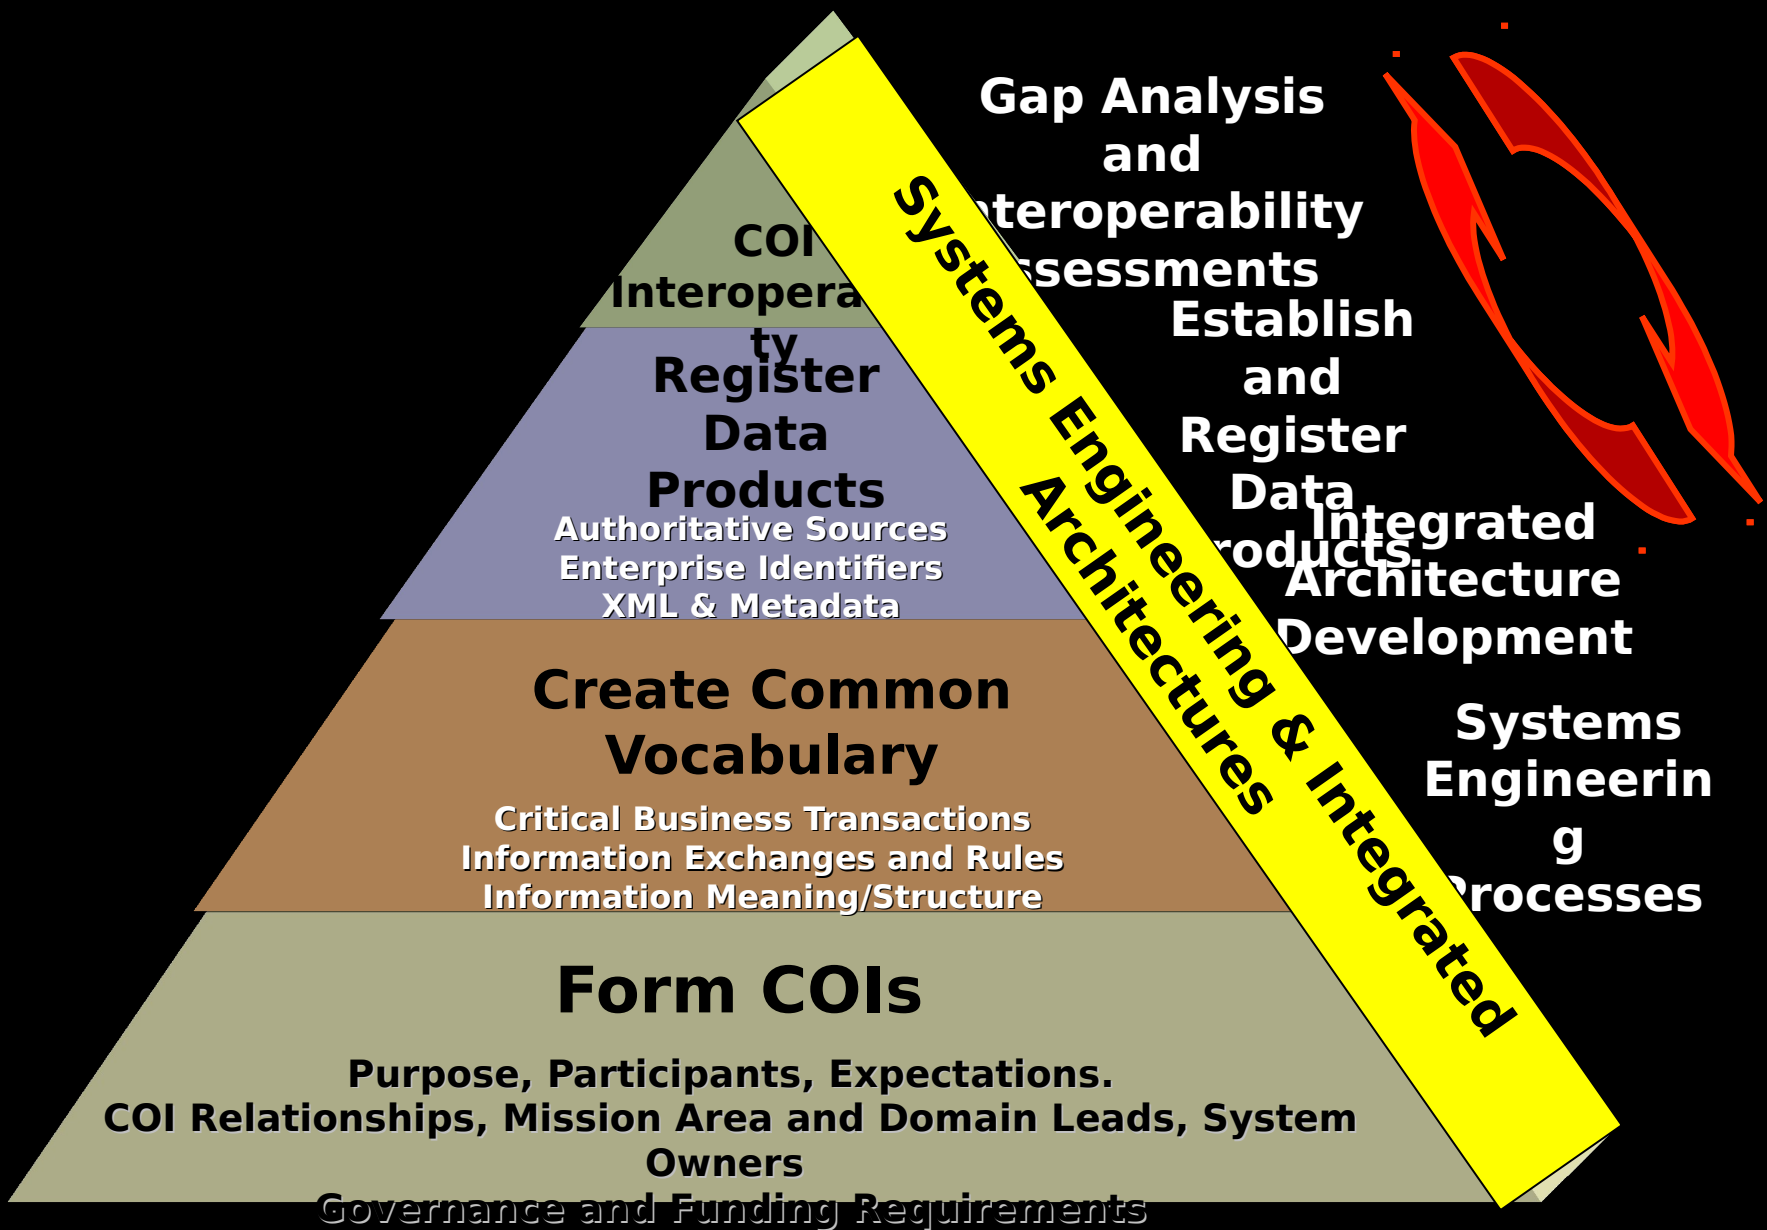

LTC Emery

PFC Smith

Standards: Data Strategy

U.S. ARMY

PM ELS

- Implement tactical ERP component of SALE
- Provide GCSS-A ERP - support CSS

Transformation Vision

- Deliver right information, at right time to right place
- Reduce logistics footprint on battlefield
- The Plan.
 - First - supply and maintenance
 - Second - integrate with finance, human resource, medical, transportation and many other CSS functions
 - And Then - interface with FCS

PM AIT - upgraded Theater Distribution Center (TDC)

- Upgraded RFID capabilities
- TDC - no capability to write tags for container/pallet breakdown and reconsolidation area
- Automated Manifest System (AMS) software provides the tag-writing capability
- Cargo data downloaded to computer and RFID tags written with the contents of containers/pallets

Linking Business Mission Area capabilities and to end through enterprise

National Strategy

Maintenance

In-Process

Fort/Factor

Factory to Foxhole

Product Manager, Defense Wide Transmission Systems (PM DWTS)

- Fielded Deployable Port Operations Center (DPOC) to the 595th Transportation Terminal Group Forward (Provisional) -
 - Suite of IT systems contained in an 8 x 20 ft shelter
 - Satellite connectivity (FSAT)
 - Deployable office
 - NIPRNET
 - SIPRNET
 - VTC
 - fax
 - "same IT capabilities they have"

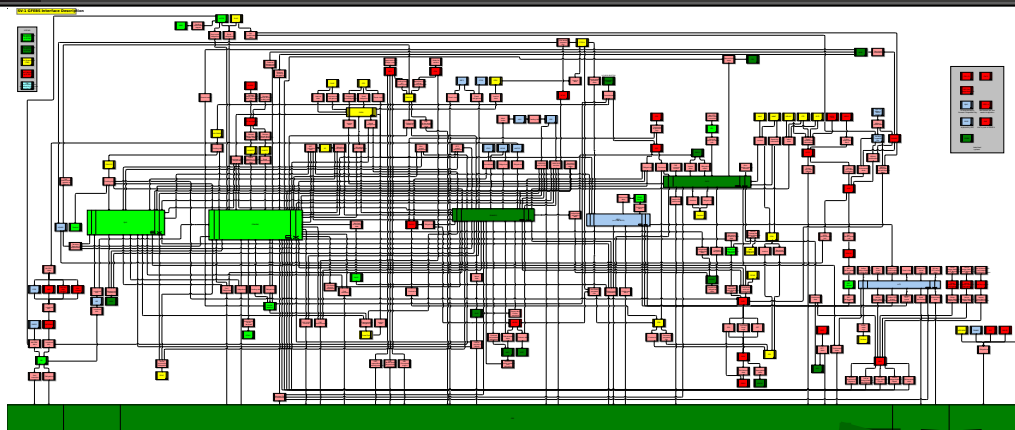

Operational

U.S. ARMY

GFEBs

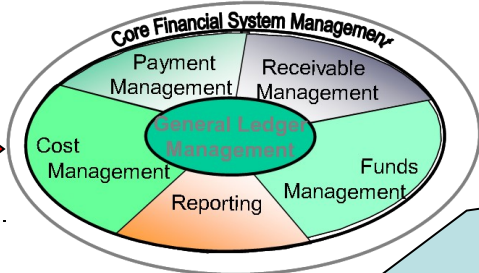

This is the current portfolio!

Integration Nightmare!

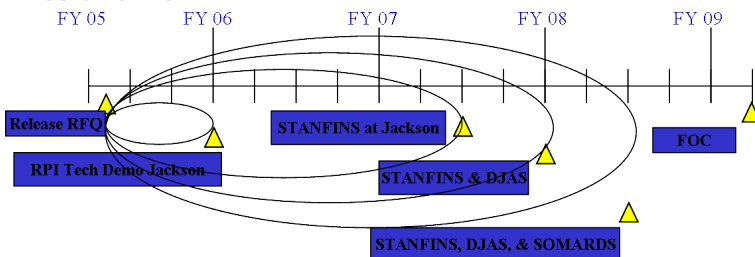

What
(Scope of the Buy)

Why
(Business Case)

- Army Business Transformation
- Divest costly infrastructure
- Improve readiness reporting
- Positive ROI

When
(Cost and Schedule)

"The Need"

- A Modern Financial Capability to Support the Modular, Joint, and Expeditionary Army
- Timely, Reliable, Accurate Financial Data for Decision Making
- Replace Legacy Systems and Processes that Prevent Reliable Budget Execution
- Comply with Laws and Regulations

DMS-Army Modernization

Today

Local Control Centers:
89

DMS Servers:
908

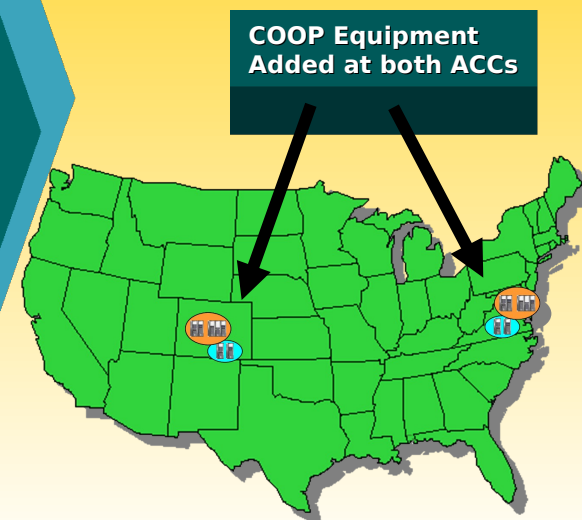

Motivation

- Supports SA/COA's ARMI Goal 3 initiatives
 - Aligns with the Army Enterprise Infostructure campaign plan
 - Maximizes the GIG
 - Improve DMS-Army operational availability and performance
- Reduces Total Cost of Ownership (TCO):
 - Software licensing
 - Hardware maintenance and tech refresh
 - O & M
- Improves management - smaller footprint
 - Deploy software changes faster and less obtrusively
 - Improved monitoring of system health
 - Improved configuration management control
 - Simplified management of IAVAs and network defense
 - Reduced resources to operate and maintain

Objective

User access

- Via web-client
- Authenticate using CAC—Fortezza moved to ACC
- Small presence needed at user locations to assist with troubleshooting

Area Control Centers:
2

DMS Servers:
90

Take Away's

Adapting to a new Reality!

....a war that will endure for the foreseeable future

"The Center of Transformation is Information Technology"

The Army is fielding advanced "Joint Interdependent" networking capabilities NOW!

PEO EIS - providing solutions
....from factory to foxhole

- ✓ Integrating strategic communications
- ✓ Modernizing the infrastructure
- ✓ Providing enterprise solutions (ERP)
- ✓ Getting "stuff" where it needs to be (RFID)
- ✓ Commercializing the AOR network
- ✓ Providing Logistic Communications solutions

Questions?
